

Conference Schedule

We have designed the structure of this conference to be 3 days of continuous events so that all members of the TA community around the world can participate and feel connected. The conference consists of plenaries, workshops, and social breaks.

In the **plenaries**, in addition to the contributions of four keynote speakers, there will be three short periods of commentary on the previous few hours – moments to be together and feel a sense of community.

It is essential that you choose the **workshops** you want to attend at the time you register to make sure to optimize your chance of getting into those workshops, and especially if you require interpretation (available in 13 languages). If you do not need interpretation, you are welcome to join an event, even at the last minute, as long as it does not yet have its maximum number of participants.

Social breaks are recreational times during which participants can choose to play games, chat with each other in coffee breaks, or watch recordings of plenary sessions they missed. None of the activities organized in the social breaks require a reservation – you can just show up.

Below is the schedule for all 3 days of the online conference. A few items to be aware of:

- ▶ Times in the first column are START times and are always in UTC 24-hour time. To calculate these times for where you live, [use this app](#). If you live in the UK, remember that British Summer Time (BST) in June is not the same as UTC.
- ▶ We have a total of 13 time slots for all of the workshops. Some time slots have 5 workshops, but other time slots have fewer; in those instances, you will see empty spaces.
- ▶ The letter(s) at the top left corner of each workshop description designate which TA application(s) the workshop applies to: **C**ounseling, **E**ducation, **O**rganizational development, **P**sychotherapy, or **ALL** four applications.
- ▶ Where workshops have a limited enrollment, that is noted at the top right corner of each description (e.g., MAX 40).
